

OGTAY ISKANDAROV

SUMMARY

Hey there! My name is Ogtay and I'm a 20-year-old frontend developer from Baku, with **over two years of experience** building beautiful, user-friendly websites. When I'm not coding, you can find me watching football (I might even yell at the screen a bit... but who doesn't?), or getting lost in a good movie—whether it's a thriller, action, or even a comedy to unwind.

I'm the type of person who believes in writing clean code and building great relationships, whether it's with teammates or clients (I'm friendly like that!). I love to learn new things every week, so my skills are always growing—kind of like my movie collection, which keeps getting bigger, by the way.

If you're looking for a frontend dev who can bring a little bit of fun to your project (and maybe even predict the outcome of your favorite football game), I'm your guy!

EXPERIENCE

Front-End Developer

Self Employed | Freelance | Baku | January 2024 - Current

As a **freelance frontend developer**, I had the opportunity to collaborate with clients from diverse countries, including Russia, Kyrgyzstan, Kazakhstan, and others. This international experience allowed me to work on a variety of projects, ranging from small businesses to large-scale platforms, adapting to different cultural nuances and business needs. I provided tailored web development solutions, focusing on creating responsive and visually appealing websites that met client requirements. My ability to communicate effectively across language barriers and time zones, combined with a strong understanding of frontend technologies, helped me deliver high-quality results that exceeded client expectations. This global exposure enriched my professional skills and broadened my perspective on web development in different regions.

Front-End Mentor

Celt Colleges | Baku | April 2024 - July 2024

As a Front-end Mentor at **Celt Colleges**, I played a key role in guiding and supporting students through the process of building responsive, user-friendly web applications. My responsibilities included mentoring learners in *HTML, CSS, JavaScript*, and modern frontend *frameworks*, helping them troubleshoot coding challenges, and providing feedback to enhance their technical and problem-solving skills.

HOBBIES

When I'm not coding, you'll likely find me immersed in a good **movie** or a gripping **book** (I'm a sucker for a great plot twist). I'm a huge football fan, so weekends are

SKILLS

Soft skills

- Problem-Solving
- Client Communication
- Mentorship & Teaching
- Collaboration & Teamwork
- *Continuous Learning*

Client Side

- HTML
- CSS, SCSS, LESS
- TailwindCSS
- Responsive design
- All UI Libraries (Shadcn UI, Bootstrap & etc.)
- TypeScript, JavaScript
- React, Next.js
- State managers (Redux, Jotai, Context API)
- GIT

Server Side

- Node.js
- Express.js
- Nest.js
- MongoDB
- MySQL, PostgreSQL
- Convex
- Prisma

EDUCATION AND TRAINING

Bachelor

Computer Engineering
Azerbaijan Technical University, Baku,
Azerbaijan

Expected in May 2025

Junior Developer

often spent cheering on my favorite team—or attempting to recreate their moves on the field (with varying degrees of success).

I love long **walks**, whether it's exploring the city or just clearing my head with a bit of fresh air. There's something about a good stroll that sparks creativity! I'm also all about **adventure**—whether it's discovering a new spot in town or diving into new programming challenges (yes, I consider debugging an adventure too!).

Music is another passion of mine, and I'm always looking for new tracks to add to my playlist—whether it's to match my mood or pump me up for coding sessions. **Life's a balance between creativity, adventure, and a little bit of fun, and I try to make the most of all of it!**
